**Description:**

**This Patent is a combination cellular telephone, voice recorder and e-mail device that lets you take a voice note on your cellular phone without recording the other side of the conversation. Once you have your voice notes you can send them as a text via e-mail.**

**When a caller has left a voice mail message on your cellular phone you can forward that recorded message as a text via e-mail to your own e-mail address, or to any other selected e-mail address from your programmed e-mail list.**

**To learn more about this device please go to Google and then search Google Patents select Google.com/patents. In the search box enter 09/329562 then open up: Combination Cellular Telephone and Sound Storage Device Method. Please call broker for more details on this opportunity.**
